

## **HUNSC**

The United Nations Security Council is arguably a main organ of the United Nations, mainly responsible for the international security and peacekeeping operations.

At the 5<sup>th</sup> ATSMUN 2019, the HSC is introduced and it is a historical simulation of the UN SC with the same goal of the SC. It is framed within regular SC rules, it takes place at a time of great world turmoil and gives delegates the opportunity to change the course of history in their favor while considering the real world and the historical consequences and to take decisions backed up by research and critical thinking.

There are five permanent members in the SC (P5) with VETO power and 10 more countries elected every two years, the non-permanent members.

This committee is addressed to advanced delegates.
